Portfolio: archive-of-the-ancients.vercel.app

CAREER OBJECTIVE

Driven Computer Science Engineering undergraduate (4th Semester) with a strong foundation in Artificial Intelligence, Machine Learning, and Full-Stack Web Development. Experienced in building and deploying production-grade AI-powered applications with multimodal capabilities — including computer vision, speech analysis, conversational AI, and adversarial learning. Seeking opportunities to apply technical depth, creative problem-solving, and hands-on deployment experience to real-world challenges while continuously advancing in Data Science and AI research.

EDUCATION

Bachelor of Technology in Computer Science & Engineering July 2024 – 2028

Gandhi Institute of Engineering and Technology, Gunupur

Current CGPA: 8.98 — 4th Semester (Ongoing) — *Achievement: University Topper in 1st Year (CGPA: 9.82)*

Higher Secondary Education (CHSE) Sept 2021 – Mar 2023

Nalanda Vidya Mandir, Berhampur

Percentage: 80.16%

Secondary Education (Matriculation) Aug 2020 – Mar 2021

Khallingi High School, Khallingi, Ganjam

Percentage: 82.5%

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, TypeScript, Java, C, HTML, CSS
- **AI / Machine Learning:** TensorFlow, PyTorch, Scikit-learn, MediaPipe, OpenCV, LSTM, ARIMA, NLP, Computer Vision
- **Web Development:** React.js, Node.js, Three.js, GSAP, Tailwind CSS, Vite, Flask, REST APIs
- **Data Science:** NumPy, Pandas, Matplotlib, Jupyter, Predictive Modeling, Data Analysis
- **Databases:** MySQL, Supabase
- **Version Control:** Git, GitHub
- **Tools & Platforms:** Vercel, Figma, Microsoft Excel, Tableau, Arduino

PROJECTS

Holistic Interview Intelligence – AI Interview Preparation Platform

Computer Vision, Speech Analysis, NLP, Multimodal AI [Live] [GitHub]

- Built a multimodal AI system analyzing both verbal and non-verbal interview performance in real time.
- Computer vision models process webcam feeds for facial expression analysis (confidence, nervousness, emotional states).
- Speech recognition and NLP pipelines evaluate verbal responses for clarity, rate, and accuracy.

- Fusion layer synthesizes multiple modalities into coherent, actionable feedback for placement readiness.

CyberGuardian AI – Adversarial Cybersecurity Awareness Trainer

Conversational AI, Emotion Detection, Psychology, AI Ethics [Live] [GitHub]

- Developed an AI system simulating realistic scammer behavior using emotional manipulation tactics for education.
- Employs emotion-detection and psychological modeling to craft convincing scam scenarios.
- Upon detecting user vulnerability, the system breaks character and provides targeted cybersecurity awareness training.
- Explored ethical edges of AI — using deceptive techniques responsibly for educational purposes.

CareerSoulmate – AI-Powered Career Guidance Engine

Machine Learning, Web Scraping, Multilingual AI, Decision Intelligence [Live] [GitHub]

- Designed an AI-driven career comparison engine with personalized recommendations based on aptitude, interests, and constraints.
- Web scraping aggregates current career information; ML models process user profiles for personalized guidance.
- Features side-by-side career trajectory comparison, timetable generation, and multilingual accessibility.

ICU Patient Monitoring System (B.Tech Project)

Python, Flask, TensorFlow, LSTM, ARIMA, React.js

- Developed a real-time ICU patient monitoring system for early disease detection using AI-based predictive models.
- Implemented LSTM and ARIMA models for time-series analysis to identify anomalies in patient vitals.
- Designed a responsive React.js dashboard for real-time visualization and alert generation.
- Integrated a Flask-based backend for data processing and machine learning model deployment.

Room Finder – Room & Domestic Helper Platform

Full Stack, Deployed Product [Live] [GitHub]

- Built a full-stack platform connecting tenants and landlords with location-based search, preference filtering, and listing verification.
- Deployed for real users handling actual transactions — learned the difference between working code and deployed systems.

Data Science Club Website – GIET University

HTML, CSS, JavaScript, Responsive Design [Live] [GitHub]

- Developed the official web platform for GIET University's Data Science Club — events, projects, and learning resources.
- Built with responsive design and structured for future scalability and member engagement.

Archive of the Ancients – Personal Portfolio

React, TypeScript, Three.js, GSAP, Tailwind CSS, Vite

- Engineered a premium interactive portfolio with 3D physics-based animations, interactive book interface, and museum-grade aesthetics.
- Features starfield backgrounds, rope physics timeline, parallax-driven project showcase, and full autobiography section.

Fruit Disease Prediction System

Machine Learning, Image Processing

- Built a machine learning model to classify fruit diseases using image datasets.
- Performed image preprocessing, feature extraction, and model evaluation.

Solar Panel Wiper (Science Exhibition Project)

Arduino, Hardware-Software Integration

- Designed an automatic system to clean dust from solar panels based on dust detection.
- Awarded Rs. 10,000 cash prize and certificate at the exhibition level.

HACKATHONS & COMPETITIONS

Smart India Hackathon (SIH) 2025 – Participant

- Participated with a problem statement focused on satellite image analysis.
- Contributed to designing a platform analyzing satellite images for land/field region attributes.
- Aimed to detect region-specific attributes such as land usage patterns, surface conditions, and field characteristics.

COURSES & TRAINING

- **Data Science Course** – CodeWithHarry (Python, NumPy, Pandas, Data Analysis, ML Fundamentals)
- **Python with MySQL Internship** – Hands-on experience in Python programming and SQL database connectivity
- **Ultimate Job-Ready Data Science Course** – Training in data analysis, statistics, and ML workflows

CERTIFICATIONS

- Basics of Arduino and Arduino Programming – Gandhi Institute of Engineering and Technology
- Python Bootcamp – LetsUpgrade (NSDC)
- SQL Bootcamp – LetsUpgrade (NSDC)
- HTML & CSS Bootcamp – LetsUpgrade (NSDC)
- ChatGPT Bootcamp – LetsUpgrade (NSDC)

ACHIEVEMENTS & AWARDS

- Built and deployed 5+ live, production-grade web applications as a 2nd-year undergraduate.
- University Topper in 1st Year B.Tech (CGPA: 9.82).
- Participant, Smart India Hackathon (SIH) 2025.
- PMST Merit Scholarship Winner (10th Class).
- Math Olympiad Participant.
- Science Exhibition Winner – Solar Panel Wiper Project (Rs. 10,000 award).
- First Prize – Drawing; Second Prize – Singing and Debate.

SOFT SKILLS

Communication, Problem Solving, Critical Thinking, Time Management, Adaptability, Rapid Prototyping, Creative Design Thinking

LANGUAGES

English (Proficient), Hindi (Fluent), Odia (Native)

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge.
